PROFESSIONAL SUMMARY

Senior iOS Developer with 12+ years of experience building and maintaining scalable mobile applications across fintech, healthcare, automotive, sports, and communication platforms. Strong expertise in Swift, UIKit, mobile architecture, App Store delivery, and technical leadership. Experienced in leading engineering initiatives, mentoring developers, improving application architecture, and delivering production-grade applications for both startups and enterprise clients.

TECHNICAL SKILLS

iOS Development - Swift, Objective-C, UIKit, AutoLayout, CoreData, XCTest, async/await

Architecture & Patterns - MVVM, VIPER, VIP, Clean Architecture, Coordinators, Modularization, Dependency Injection

Networking & APIs - REST APIs, GraphQL, Apollo, URLSession, WebSockets

Backend & Other Technologies - Vapor, PHP, Kotlin, Java, .NET Core, Android

Tools - Xcode, Git, Firebase, Jira, TestFlight, App Store Connect, Firebase Analytics / Crashlytics, SPM, CocoaPods

Practices - CI/CD, Agile/Scrum, Code Reviews, Mentoring, Technical Leadership, Unit Testing, Performance Optimization

PROFESSIONAL EXPERIENCE

Senior iOS Developer & Backend Developer

Sep 2020 – Present

Developing mobile and backend solutions for international clients across fintech, sports, restaurant management, staffing, and communication platforms.

- Built and maintained production-grade iOS applications from architecture design to App Store release and production support
- Designed scalable mobile architectures using MVVM, VIPER, Clean Architecture, and Coordinators
- Integrated third-party services including Stripe payments, analytics, video communication, and real-time data services
- Improved maintainability and reliability through refactoring, modularization, and architectural improvements
- Contributed to backend integrations and services using Swift Vapor, Kotlin, and PHP

Selected Projects

Atlas World Sports

- Developed and maintained a live sports tracking and betting companion application with real-time data features
- Owned major parts of the iOS lifecycle including architecture, feature delivery, App Store releases, and production support

Wisk

- Developed backend integrations and POS synchronization workflows including Lightspeed K integrations
- Contributed to backend services using Swift Vapor and Kotlin in a distributed systems environment

Zenjob

- Built and maintained iOS features for a large workforce marketplace platform
- Improved application reliability and code quality through refactoring and architectural improvements

Product Owner & Mobile Developer

Continental Automotive - Novi Sad, Serbia

Dec 2019 – Nov 2020

Worked on the Remote Vehicle Data (RVD) platform focused on connected mobility and vehicle data services.

- Led mobile architecture and technical direction across multiple engineering teams working on connected vehicle solutions
- Reduced technical debt and improved maintainability by introducing Clean Architecture principles and better code organization
- Developed and maintained iOS and Android applications within a connected vehicle ecosystem
- Coordinated backlog prioritization and delivery across mobile, backend, and frontend teams in an agile environment
- Mentored developers through code reviews, technical discussions, and internal knowledge-sharing sessions

Mobile Team Lead & Senior iOS Developer

Vega IT - Novi Sad, Serbia

Mar 2014 – Dec 2019

- Led mobile development initiatives across long-term fintech and healthcare client projects
- Mentored developers through code reviews, onboarding, architecture discussions, and technical guidance
- Participated in architecture planning and technical decision-making across multiple mobile teams
- Built and maintained secure mobile banking applications used by large enterprise user bases
- Developed healthcare applications using MVVM, Coordinators, Clean Architecture, and GraphQL networking
- Participated in the full mobile application lifecycle including implementation, testing, App Store releases, and production support

EDUCATION

Master's Degree in Computer and Control Engineering

Faculty of Technical Sciences

2013 – 2015

Bachelor's Degree in Computer and Control Engineering

Faculty of Technical Sciences

2009 – 2013

LANGUAGES

- Serbian — Native
- English — Professional Proficiency

ADDITIONAL INFORMATION

- Experience leading distributed engineering teams
- Full App Store release lifecycle ownership
- Backend development experience with Swift Vapor
- Half marathon runner and endurance sports enthusiast
